Professional Summary

Software Engineer and IT professional experienced in building full-stack web applications, administrative systems, and responsive interfaces for business and institutional needs. Skilled in React, TypeScript, Tailwind CSS, NestJS, .NET, REST APIs, SQL Server, Cypress, Docker, and Git/GitHub. Combines software development, QA, Agile/Scrum, and stakeholder collaboration to deliver maintainable, user-focused solutions.

Experience

Freelance

Front-End Developer

Remote

Nov 2025 – Present

- Developed and delivered custom websites for small and medium-sized businesses, translating client requirements into responsive, user-focused solutions.
- Collaborated with clients to gather requirements, communicate progress, and incorporate feedback throughout development.
- Implemented responsive interfaces and usability improvements across desktop and mobile experiences.

Macro

Full-Stack Developer

Remote

Jul 2025 – Nov 2025

- Developed authentication interfaces for login, registration, and password reset workflows, prioritizing usability and clear user interactions.
- Built a microservice for creating, updating, deleting, and categorizing client records, supporting structured data management.

CTP La Mansion

Full-Stack Developer / Scrum Master

Remote

Feb 2024 – Jun 2025

- Developed a custom ERP-style administrative system used by 30+ staff members, digitizing workflows and reducing paper usage by 80%.
- Built full-stack features supporting employee and administrative operations, translating business processes into software functionality.
- Led an Agile development team as Scrum Master, coordinating sprints, milestones, and delivery schedules.
- Collaborated with stakeholders to gather requirements and translate administrative processes into scalable software solutions.
